Powder, flakes or cubes as applicable

FRUITS
Mango · banana · lemon · strawberry
Spray-dried / freeze-dried powders and chunks

INDUSTRIAL FORMS
Flakes / kibbled · chopped / minced · granules · micro-fine powders

A partner-led supply model

ZAPAX is a sourcing and export partner, not a manufacturer. We work with producing partners to discuss available product, align buyer requirements and coordinate export supply. Product origin, process, exact specification and availability are confirmed for each inquiry and order.

Specifications at a glance

ITEM	BUYER-LED DETAILS
Form & cut	Select the relevant flakes, chopped / minced pieces, granules or powder format from the product range.
Mesh & particle size	State required sieve range, cut size or particle profile in your inquiry. Confirmation is product- and partner-specific.
Moisture & shelf life	Current values and shelf-life documentation are confirmed against the specific product and agreed specification.
Quality documents	Share destination market and requested microbiological, chemical, physical or other document needs for review.

Every order begins with a conversation. Send product, intended application, form / mesh, volume, destination port and target timing so the available options can be checked.

What buyers can expect

SOURCE Connect the buyer brief with producing partners.	**ALIGN** Clarify product form, specifications and pack needs.	**COORDINATE** Discuss destination, documents and shipment planning.

EXPORT PACKING & ORDER PLANNING

From product brief to shipment plan

Packaging is discussed against the product, destination, handling needs and buyer preference. Final details are agreed before order confirmation.

Packaging options

BULK CARTONS	BARRIER BAGS	RETAIL FORMAT
Poly-lined corrugated cartons. Common requested net weights include 10 kg, 20 kg and 25 kg, subject to product and agreement.	Aluminum foil vacuum bags may be discussed for suitable products and order requirements.	Customized retail stand-up pouches may be explored where product, labeling and order scope allow.

To prepare a useful inquiry

01 Product and intended food application

02 Required form, cut / mesh and preferred packaging

03 Estimated quantity in metric tons or FCL loads

04 Destination port, target timing and document requirements
