Brand colours

ZAPAX GLOBAL uses exactly three colours: indigo and turmeric, two dyes with deep roots in Gujarat's textile tradition, and white. No other colours are used in the logo, website, stationery, packaging or presentations.

ZAPAX GLOBAL Indigo

HEX #2E3277 · RGB 46 50 119 · CMYK 61 58 0 53

Primary. Logo, headings, body text, buttons, dark backgrounds.

Turmeric

HEX #E0A526 · RGB 224 165 38 · CMYK 0 26 83 12

Accent. The origin point, highlights, buttons on indigo. Never for text on white.

White

HEX #FFFFFF · RGB 255 255 255 · CMYK 0 0 0 0

Base. Backgrounds and text on indigo.

CMYK values are mathematical starting points. Colour on paper depends on stock and press, so always approve a printed proof. Ask the printer to match HEX #2E3277 and #E0A526 on the chosen stock (and, if a Pantone spot colour is used, choose it from a physical swatch book against these values).

Tints: the only softer shades

When a lighter shade is needed, use transparency of indigo, turmeric or white over white (or over indigo for the white tint). Never introduce greys, blacks, greens, reds or any other colour.

Indigo 90%

Body text · prints as #434785

Indigo 78%

Secondary text · prints as #5C5F95

Indigo 55%

Form borders · prints as #8C8EB4

Light panels · prints as #F2F3F7

Turmeric 38%

Illustration fills · prints as #F3DDAD

Turmeric 22%

Icon backgrounds, notices · prints as #F8EBCF

White 88%

Text on indigo · prints as #E6E6EF

Usage and contrast

Proportion

Roughly: white 60%, indigo 32%, turmeric 8%. Turmeric works because it is rare.

Accessible text pairs (WCAG)

Text / background	Ratio	Use
Aa #2E3277 on #FFFFFF	11.4:1	Headings, body text, links, buttons
Aa #5C5F95 on #FFFFFF	6.0:1	Secondary text (indigo 78%)
Aa #FFFFFF on #2E3277	11.4:1	Text on indigo
Aa #E0A526 on #2E3277	5.2:1	Accent text on indigo
Aa #2E3277 on #E0A526	5.2:1	Text on turmeric buttons
Aa #E0A526 on #FFFFFF	2.2:1	Avoid for text (graphics only)

4.5:1 or higher is required for body text, 3:1 for large text and graphics.
