Typography

ZAPAX GLOBAL uses one typeface family, **Archivo**, a grotesque with a variable width axis. Expanded widths echo the wide letterforms of the ZAPAX GLOBAL wordmark; normal width keeps body text compact and readable.

Aa Bb Cc 123

ABCDEFGHIJKLMNOPQRSTUVWXYZ abcdefghijklmnopqrstuvwxyz 0123456789 & ₹ $ € %

Role	Weight	Width	Size (print / web)	Sample
Display headline	Bold 700–760	Expanded 112–118%	28–48 pt / 40–96 px	**Indian produce**
Section heading	Bold 700	Semi-expanded 112%	16–24 pt / 28–42 px	**Quality you can check**
Subheading	SemiBold 600–680	Normal–105%	11–14 pt / 18–20 px	**Specification parameters**
Body	Regular 400	Normal 100%	9.5–11 pt / 16–17 px	We agree every detail in writing.
Labels, captions	Medium–SemiBold 500–600	Normal 100%	7–8.5 pt / 13–14 px	**Mobile · Email**

Rules and files

Do

Use sentence case for headings and buttons.
Left-align text; centre only short lockups.
Keep body lines under about 75 characters.
Use line height 1.5–1.65 for body, 1.05–1.2 for headlines.
Minimum print size 6 pt; minimum web size 13 px.

Avoid

All-caps paragraphs or long all-caps labels.
Synthetic italics, outlines or shadows on text.
Mixing additional typefaces in brand materials.
Setting the word “ZAPAX GLOBAL” in Archivo as a logo. Always use the logo artwork.

Font files

Archivo is licensed under the SIL Open Font License 1.1: free for commercial use, embedding and redistribution. Files are in **brand-assets/fonts/**: static Regular, Medium, SemiBold and Bold (best for Office, Canva and print vendors) and the variable font with width and weight axes (for Figma, Illustrator, InDesign and the web). Source: fonts.google.com/specimen/Archivo.

Fallbacks

If Archivo is unavailable (for example in plain email), use Arial or Helvetica. In Microsoft Office documents, embed fonts or export to PDF.
